These kits or bundles typically come with everything you need to harness and use the power of the sun for your power needs. Most of these kits will contain a solar panel (s), charge controller, power inverter, battery (ies), connectors, cables, fuses, remotes, mount etc.

These kits or bundles typically come with everything you need to harness and use the power of the sun for your power needs. Most of these kits will contain a solar panel (s), charge controller, power inverter, battery (ies), connectors, cables, fuses, remotes, mount etc.

For years now, traditional solar companies and local installers have been over-charging customers for extremely basic solar panel systems (without batteries). We're changing all of that. At ShopSolar, we offer a wide variety of payment plan options to meet each customer's needs. Fill out a short.

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment--at a minimum. Depending on where you live, you may also consider a solar battery. The components of a solar panel system are pretty simple. But different product options and brands can.
