Solar multifunctional water pump inverter

Overview

What is a solar pump inverter?

A solar pump inverter is a key part of any solar water pumping system. It converts solar power into the AC power you need and optimizes your pump's performance. By choosing the right inverter and setting it up correctly, you can maximize your water output, save on energy costs, and have a sustainable water solution that's right for you.

Which solar water pump inverter is available online?

The 5.5kW three-phase AC 220V solar pump inverter is now available online. This solar pumping inverter integrates advanced MPPT tracking for precise voltage detection and optimal performance. The solar water pumping system supports AC and DC input, with a DC voltage range of 300V~380V and a power factor >0.99.

Do solar water pumps need a specialized inverter?

Solar water pumps are a great way to access water in areas where traditional electricity might not be available. They're especially useful for irrigation or remote water needs. But to make solar power usable for these water pumps, you'll need a specialized inverter.

How does a solar inverter work?

A solar inverter changes the DC power from the solar panels into AC power, so you can use it to run things, like water pumps. Some inverters also change the voltage and make the power flow better. This is very important for solar water systems because it helps keep the water pumping even when the sun isn't shining as much.

Can a solar pump inverter damage your irrigation system?

Solar-powered water pumping systems are revolutionizing irrigation and water supply in remote areas. But choosing the wrong inverter can reduce efficiency

or even damage your system. This guide walks you through everything you need to know in 2025 to select the ideal solar pump inverter for reliable, cost-effective performance.

What is a 15 hp water pump solar inverter?

15hp water pump solar inverter with MPPT control, AC 25A output at 3-phase, rated power 11kW, and DC voltage range (280V, 750V). 15 hp solar pump inverter with RS485 communication and IP20 protection, supports AC and DC input, works at (-10°C, 40°C).
