Solar panel 30kw inverter

Overview

For most homes in the United States this 30kW solar PV ground mounted kit is more than enough to completely eliminate their bill. These 30kW size grid-connect solar kits include solar panels, string inverter, and the racking system for a grou. For most homes in the United States this 30kW solar PV ground mounted kit is more than enough to completely eliminate their bill. These 30kW size grid-connect solar kits include solar panels, string inverter, and the racking system for a ground mount. These are complete PV power systems that can work for a home or business, with everything you need.

Our kits provide all the solar components you need from start to finish. 1. Solar Panels - 30kW of Tier-1 solar panels with 25 year warranties. 2. Grid-Tied String Inverter -Ultra reliable SMA Sunny Boy inverter with Secure Power Supply and Rapid Shutdown. 3. Racking and Attachments -Industry leading IronRidge ground racking mounts the solar panels.

A typical solar ground-mounted system for a home can be installed within one or two weekends once a permit is obtained from your city or county. After that, it's just 5 easy steps until you're producing power from the sun. 1. Take your plan set to your city or county and apply for a permit to install. The plan review process can take up to 10 days.

Any licensed general, electrical or solar contractor can install our solar kits. If you select to hire a contractor to install your solar kit, you should expect to pay approximately \$1.00 per watt for labor, wire, conduit, fittings, breakers and other miscellaneous electrical components to complete the solar system installation. For this 30,000 Wat.
