Solar panels can drive up household system costs

Overview

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which.

Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor. Consider solar panels if you have a high utility bill, get lots of sun and qualify for tax breaks or other savings. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in which.

Solar panel installation costs a national average of \$18,180 for a 6kW solar panel system for a 1,500 square ft. home. The price per watt for solar panels can range from \$2.50 to \$3.50 and largely depends on the home’s geographical area. Residential solar panels are usually sized between 3 kW and 8. How much does a home solar system cost?

In 2025, we surveyed 1,000 home solar customers across the U.S. to understand their experience shopping for and installing solar panel systems. Most homeowners said they paid around \$16,129 for a solar panel system, with an average of 14 solar panels installed.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about

the national average price for a 7-kW system.

Why are solar panels so expensive?

Since 2010, the cost to install solar panels on a home has fallen by roughly 50%. Costs rose slightly from 2020-2023 largely due to supply chain tangles from the pandemic, and then fell again in 2024. Prices have ticked upward slightly in 2025 due to tariffs and a rush for solar before the 30% consumer solar tax credit expires on December 31, 2025.

Are solar panels worth it?

The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost. You can determine whether solar panels are worth it for your home by considering various factors, such as local incentives and policies, your electric bill, and how you finance the system.

How much does it cost to install solar panels before tax credit?

The average cost to install solar panels before tax credit swings wildly across the country - sometimes by more than \$20,000 for identical systems. Take California and West Virginia, for example. A typical home solar system costs around \$20,000 in California but jumps to \$45,000 in West Virginia. That's not a typo - it's more than double!.

Do solar panels save money?

You might save more with solar if electricity prices are high where you live. A solar system may provide a good hedge against rising electricity prices, which rose an average of 6.2% from 2022 to 2023, according to the U.S. Energy Information Administration (EIA). 4. Your roof
