Solar panels on sloped roofs in Iraq

Overview

Is solar energy a good idea in Iraq?

Although Iraq tends to promote the country's solar energy in two ways: Utility-scale PV units could lead to a reduction in burning of oil and gas, and rooftop solar panels would help individual households reduce their own dependence on "expensive and polluting neighborhood generators".

Is Iraq ready for solar power?

On the other hand, the Iraqi government has invited independent power producers (IPPs) to develop seven utility-scale PV solar power sites in the range between 30 and 300 MWp with a total power generation capacity of 755 MWp .

How reliable is Iraq's electricity grid?

Iraq's electrical power supply grid faces significant reliability challenges due to a combination of infrastructure damage, high loss rates, and frequent power outages. 456 Infrastructure Condition: The grid has suffered extensive damage from decades of conflict, resulting in inadequate transmission and distribution systems.

How much sun does Iraq get a year?

Discover comprehensive insights into the statistics, market trends, and growth potential surrounding the solar panel manufacturing industry in Iraq Iraq (Baghdad) receives an average of 3,250 hours of sunshine per year. The sunniest month is August with approximately 353 hours of sunshine, while January records the least at about 192 hours. 1.

How much does electricity cost in Iraq?

As of March 2024, the average cost of electricity from utility companies in Iraq (including power, distribution and transmission costs as well as taxes) is \$0.015 per kWh for residential consumers and \$0.046 per kWh for businesses.

3.

What is the sunniest month in Iraq?

The sunniest month is August with approximately 353 hours of sunshine, while January records the least at about 192 hours. 1 The average annual energy generation per unit of installed photovoltaic (PV) capacity in Iraq is approximately 1,159 kWh/kWp, based on daily average of 3.15kWh/kWp. 2
