

SolarTech Power Solutions

Solar power generation home life

Overview

What is a solar power system for homes?

A solar power system for homes is essentially a compact energy plant mounted right on your rooftop. Its job?

To convert free sunlight into usable electricity for your daily needs—powering everything from lights and fans to refrigerators and washing machines.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

How does solar energy affect your home?

Heating and cooling: If you use electricity to heat and cool your home, your heating and cooling needs will significantly affect the amount of solar energy you need. Weatherizing your home and heating and cooling efficiently will reduce the amount of electricity you need to produce with solar. 2. Assess Your Solar Potential.

Is generating your own electricity a good idea?

Making the transition to generating your own electricity can be challenging at first. But with some preparation and knowledge, it can also be a rewarding experience that provides cost-effective energy independence. Get a complete home renewable energy system walkthrough from the previous homeowner or builder.

What are the benefits of a home solar system?

One of the biggest benefits of a home solar system is its dual impact—on both

the environment and your wallet. Not only does it allow families to produce their own electricity using sunlight, but it also dramatically reduces monthly utility bills.

How did a house produce electricity?

The house had several different ways to produce electricity through alternative energy with the use of solar panels, a wind energy turbine, a battery bank and inverter, and a generator. It had a full range of amenities, including a washer and dryer, refrigerator, stove, satellite TV, propane furnace, heat pump, hot water, and even a dishwasher.
