Solar water pump inverter for balcony

Overview

3 phase solar pump inverter, also called solar variable frequency drive, converts the direct current of solar panel into alternating current, thereby driving various AC motor water pumps (centrifugal pump, irrigation pump, deep well water pump, swimming pool pump, etc.), the input can be the solar DC power supply (DC 200V-350V, DC 350V-750V), also can be single phase or three phase AC power supply (AC 220V, 380V, 400V, 460V, 480V), built-in MPPT control system to maximize the output power of the PV array, is very suitable for use in remote and dry areas.
