Somalia Wind Power Energy Storage Project

Overview

Should Somalia invest in solar & wind?

This is not just a statistical correlation; it is a clear indication that investing in solar, wind and other renewables could fundamentally place Somalia on the path of increased energy access and green transition. By contrast, other forces are pushing in the wrong direction.

What is the Somalia electricity recovery project?

MOGADISHU, December 9, 2021 —The Somalia Electricity Recovery Project is set to increase access to cleaner, lower cost electricity for 1.1 million households, or approximately 7 million people, of which 3.5 million are women. The project also aims to reestablish a stable electricity supply and support regional integration.

How much electricity does Somalia have?

Somalia's energy story is at a juncture: it has an installed capacity of approximately 400 megawatts (MW), with 300 MW powered by diesel and 100 MW by solar and wind. Today, about 80% of urban households and only around 24% of rural communities have access to electricity, according to World Bank data.

What is happening in Somalia?

Renewable energy: A engineer walks past the solar panels at the Benadir Electricity Company (BECO) solar project in Mogadishu, Somalia May 21, 2020. Prolonged droughts, erratic rainfall and floods are disrupting Somalian lives and pushing millions into displacement.

Is Somalia a sustainable country?

At the same time, 80% of Somalia's energy consumption for cooking still comes from biomass fuels, which accelerates deforestation and biodiversity loss. Yet, Somalia is also one of Africa's richest countries in renewable

potential.

Should Somalia be betting on Clean Power?

The data makes it clear: renewables aren't just environmentally sound; they're also economically and socially transformative. For Somalia, betting big on clean power may be the smartest and most achievable development decision of this decade.
