

SolarTech Power Solutions

Sophia grid-connected inverter sales

Overview

What is grid tie solar inverter?

Grid tie solar inverter with high performance MPPT and APL functions, simply connect the solar power inverters to solar panel system. This type of solar pv inverter often used in residential solar power system, battery energy storage system and wind power system.

What is a single phase grid on inverter?

For single phase grid on inverter, this type of solar inverter converts direct current (DC) from solar panels into alternating current (AC) that matches the voltage, frequency, and phase of the electrical grid. It uses maximum power point tracking (MPPT) to optimize the energy harvest from solar panels.

What is an off-grid inverter?

Modern, off-grid inverters, or multi-mode inverters, can also be used to build advanced hybrid grid-tie energy storage systems. Many off-grid systems also use solar charge controllers (MPPTs), which are DC-coupled between the solar panels and battery, to regulate the charging process and ensure the battery is not over-charged.

What is grid connected inverter?

Grid connected inverter is a crucial component in solar power systems that integrate with the electrical grid. For series of 300 watt to 1000 watt rated power inverters, feature with pure sine wave output, no battery design, wide DC input (20V-50V DC) and AC output (90-140V AC / 180-260V AC) range.

Do hybrid inverters cost more than a solar inverter?

It's worth noting that hybrid inverters used for battery storage generally cost 20 to 40% more than the equivalent size solar inverter due to the additional battery controls and energy monitoring. However, the price difference is declining as manufacturers utilise common components across the inverter

range.

Are grid tie inverters worth it?

Grid tie inverters are a great cost-saving addition to your home solar system, but they don't often come cheap. If budget is your primary concern, then you'll be glad to know there is a trustworthy brand out there with a grid tie inverter just for you. Y&H have produced this micro-inverter to cover conversion of DC power up to 350 watts.
