

SolarTech Power Solutions

Southeast Asian villa roof solar panel manufacturer

Overview

What is the Southeast Asia Solar supply chain map?

This edition of the Southeast Asia Solar Supply Chain Map provides a detailed snapshot of current realities and future ambitions, as the region navigates complex trade, investment, and production challenges.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Are solar tariffs affecting Southeast Asia's solar industry?

Some Southeast Asian manufacturers are now facing duties of more than 250% on imported solar products. The burden of these tariffs on foreign manufacturers could change the supply chains for solar panels coming to American consumers, and the shape of that industry in the U.S.

Where do Southeast Asia's Solar Exports come from?

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 sourced from Malaysia, Vietnam, Thailand and Cambodia, according to BloombergNEF. But this successful run is now under threat.

Will convalt energy revive solar panel manufacturing?

For years, the commitment to solar panel manufacturing has been missing in America. Convalt Energy is on track to revive this industry by becoming America's second-largest mono-crystalline solar panel manufacturer. Convalt started developing power generation projects in Asia and Africa.

Is Convalt developing a solar project in Chad?

Convalt is developing a 120 MW solar project to service the capital region of Chad – namely N’Djamena. Convalt is developing a series of rural electrification projects across Sierra Leone for an aggregate of 60 MW. Convalt is developing a 30 MW solar project at N’Djamena International Airport in the Republic of Chad.
