

SolarTech Power Solutions

Spain 40kw solar power generation and storage integrated machine

Overview

Spanish startup BlueSolar has unveiled a patented PV-CSP system that combines hybrid panels and thermal storage to deliver uninterrupted solar power. Is Spain's energy storage strategy achievable?

President of Spain's national energy storage association AEPIBAL, told this site in June that the country's renewable strategy, including the energy storage deployment roadmap, is "absolutely achievable".

What's happening with solar-plus-storage in Spain?

Another interesting solar-plus-storage development for Spain was reported by Energy-Storage.news last month: Enel Green Power ordered a vanadium redox flow battery (VRFB) energy storage system from technology provider Largo Clean Energy for installation at a solar plant on the island of Mallorca.

Which solar projects are being carried out in Spain & Portugal?

These projects are being carried out specifically at the Manzanares solar park in Castilla-La Mancha and the Alcoutim solar cluster in the Algarve region, positioning the company among the leaders in renewable energy storage in Spain and Portugal.

How can Spain transform its energy system into a climate-resilient country?

To ease financing, beneficiaries may request advance payments of up to 100% of the awarded aid, provided certain conditions are met. These efforts are part of a broader strategy to transform Spain's energy system into one that is more flexible, robust, and climate-resilient.

Does Galp have a solar farm in Spain?

The integration of these storage systems reinforces the company's renewable development plan Galp has recently launched two new solar farms in Spain: Toledo and Ahín (Castilla-La Mancha), with a capacity of 65,4 MWp and an estimated production of 127.000 MWh per year, and Almaraz (Extremadura),

with 49,87 MWp and an annual production of 95.000 MWh.

Will Iberdrola build a green hydrogen plant in Spain?

Iberdrola said in September as the project went online that while it is the company's — and the country's — first solar-plus-storage system and first renewable energy project coupled with batteries, it is already building a green hydrogen plant in Spain which includes 100MW of solar PV and a 20MWh lithium-ion BESS.
