

SolarTech Power Solutions

Supply of Tanzania Valley Power Energy Storage Devices

Overview

What is the main source of electricity in Tanzania?

The key components of Tanzania's electricity generation 99% included natural gas, hydro power and other renewables 0.02% such as wind, solar and biomass. In 2022, the country's electricity was mostly generated from natural gas (77%), hydro (11%), oil (9.7%), coal (0.8%), and biofuels and waste (1.3%). Solar PV is negligible.

What is the power distribution system in Tanzania?

The generation, transmission, and distribution of power in Tanzania, is channeled through TANESCO, which is fully owned by the government and is responsible for 98% of the electricity produced in the country. As of June 2022, the power distribution network length was 160,811km, of which 160,367 km was for TANESCO and 444 km for Mwenga.

Why is energy consumption increasing in Tanzania?

Energy consumption in Tanzania has increased 380% (Figure 3). This increase was driven by the rapid growth of population and economic development, both production and consumption. Between 1990 - 2017, the average five-year growth rate of energy consumption stood at 12.6%. This trend signals the need to invest in supply capacities.

What is Tanzania's energy supply in 2022?

In 2022, Tanzania's Total Primary Energy Supply (TPES) reached 36,119.4 kilotonnes of oil equivalent (ktoe). Biofuels, primarily wood and charcoal, dominated the energy mix, accounting for 82% of the TPES. Oil products made up 10.7%, while natural gas, coal, and hydro contributed smaller shares.

Which sector consumes the most energy in Tanzania?

The sectoral breakdown of Tanzania's energy demand shows 0.98% that the residential sector is the largest consuming sector, comprising

nearly 64% of total final Solar and Coal 2.4% 99% consumption. This is followed by industry (16.4%), transport (12.2%), and agriculture, forestry and fishing (4.4%).

What fuels do Tanzanians use?

heating, lighting, communication and for productive uses'. According to the Tanzania Cooking Energy Master Plan (2022), 87% of all rural households cook with traditional biomass fuels, followed by 6% of the households using improved cookstoves with firewood and/or charcoal, 4%
