

**SolarTech Power Solutions**

# **Taipower Energy Storage System**

## Overview

---

Taipower collaborated with a major mobile and electric company, TECO, and an energy storage integrator, Fluence, forming an international team and installing 25 40-foot storage containers at the Longtan Ultra-High Voltage Substation, utilizing over 10,000 lithium battery.

Taipower collaborated with a major mobile and electric company, TECO, and an energy storage integrator, Fluence, forming an international team and installing 25 40-foot storage containers at the Longtan Ultra-High Voltage Substation, utilizing over 10,000 lithium battery.

On November 20, Taipower held the Sustainable Energy Storage, Stable Grid inauguration ceremony for the Dongshan Energy Storage System at the Dongshan EHV Substation in Yilan. The new energy storage system adds power for renewable energy! In response to international energy transitions and net-zero.

State-run Taiwan Power Company inaugurates today (Jan. 22) the Longtan Energy Storage System, the largest such facility in Taiwan up to now, built by TECO Electric & Machinery, on a turnkey basis. Sophia Chiu, TECO chairman, points out that the launch of the system marks a milestone for Taiwan in.

Taipower has constructed the Longtan Energy Storage System to enhance grid resilience, tripling the existing capacity to 60MW. Transforming the substation into an energy storage hub, the "Grid Empowerment, Resilience Forever" ceremony was held today. Taipower highlights the system's ability for.

r grid system is an independent power grid. To cope with the impact of renewable energy integration in the future, there is a demand for energy storage systems. The government's policies on energy storage can be summarized as follows: (1) Solving the problem of in energy storage system installation.

Taipower has built a 20 MW energy storage system at Tainan's Salt Field Solar PV Farm, consisting of eight 20-foot storage containers with more than 1,000 lithium battery modules. The total electricity storage capacity reaches 20,000

kWh, which is equivalent to the power consumption of 40,000.

TCC launched the 35MW E-dReg energy storage system in Su'ao, Yilan, on April 15th, officially joining national grid company Taiwan Power Company's (Taipower) electricity trading platform. The E-dReg (Enhanced Dynamic Regulation) currently boasts the highest average clearing price among electricity.
