# Tanzania Office Building Energy Storage Project

## Overview

---

The rate of energy use around the world in recent years has been alarming. In Africa, and Tanzania in particular, the energy demand for office building is increasing annually as a result of urbanisation, p.

How can Gy improve supply security in Tanzania?

gy while improving supply security. Running large-scale international auctions for pro-curement of wind power and solar PV would be the best way to bring much needed private in-vestment to boost the generation capacity in the Tanzanian power system, and a natural part of the least-cost expansion approach.

How much investment is needed to meet Tanz-Ania's growing energy demand?

ancing the clean energy transitionAs outlined in section 4.1.2, approximately USD 100 billion in investments is required to meet Tanz-ania's growing energy demand tow.

Is able energy in the electricity mix a problem in Tanzania?

able energy in the electricity mix. In a Tanzanian context, the extensive rural distribu-tion grid that has been established over the past years constitutes a particular concern with regards to.

Does Tanzania have flexibi lity in low-cost variable renewables?

nts in low-cost variable renewablesA key finding of this study is that Tanzania, unlike many of its peers in the region, has ample flexibi lity available in its power system. This is fortunate, because it means that even without investments in energy storage, the system can absorb a signifi-cant amount of low-cost variable renewable ene.

How can Tanzania improve rural electrification?

prove its operational performance. Tanzania should take a holistic approach to rural electrification that considers the needs and limitation of the integrated

grid, and the operations and maintenance (O&M) obligations sector investments in renewables. Strengthen regulatory independence and ensure that the Ministry of Energy.

Should Tanzania subsidise the cost of connectivity?

are already applicable in Tanzania. Finally, given that approximately 5.8 million Tanzanian households living within reach of the grid are estimated to remain without connectivity in 2030, subsidising the cost of connection may arguably be the most cost-efficient way to let more Tanzanians
