

## SolarTech Power Solutions

# Three-phase water pump inverter

## Overview

---

3 phase solar pump inverter, also called solar variable frequency drive, converts the direct current of solar panel into alternating current, thereby driving various AC motor water pumps (centrifugal pump, irrigation pump, deep well water pump, swimming pool pump, etc.), the input can.

3 phase solar pump inverter, also called solar variable frequency drive, converts the direct current of solar panel into alternating current, thereby driving various AC motor water pumps (centrifugal pump, irrigation pump, deep well water pump, swimming pool pump, etc.), the input can.

Dive into the essentials of selecting a 3-phase solar pump inverter with this guide, highlighting the different types, key applications, and critical selection considerations. Uncover how these devices efficiently transform solar energy into a reliable power source for water pumps, facilitating.

and they offer battery-less operation by converting solar energy directly into AC power that drives water pumps. This helps reduce overall system cost by offering excellent autonomy and low maintenance expense which is crucial in farming. The high efficiency SP series allows PV input of up to 800V.

In the pursuit of sustainable and cost-effective water pumping solutions, three-phase solar pump inverters have emerged as a game-changing technology. These inverters harness the power of solar energy to drive three-phase submersible pumps, providing an efficient and reliable means of water.

In selecting a 3-phase 380V solar water pump inverter, ranging from 0.37kW to 250kW, it's critical to understand both the key considerations for choosing an inverter and the diverse application scenarios where solar pump systems can be effectively utilized. This comprehensive approach ensures that.

0.75 kW 1 hp solar pump inverter with AC 3.8A output current at 1-phase 220V, supports DC and AC power input. The DC voltage range of the solar pump inverter is (120V, 480V) and the recommended MPPT range is (250V, 400V). IP20 protection, solar inverter humidity <95% RH, storage temperature (-20°C).

The right 3-phase solar pump inverter boosts performance and longevity of your system. A well-chosen inverter helps optimize energy consumption, reduces maintenance costs, and enhances overall system efficiency. Making an informed decision about your solar pump inverter is crucial for long-term.
