solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among them especially batteries, to provide the flexibility required to smooth the energy supply which is expected to reach.

The ASSAD Group, a leader in the battery industry for over 80 years, stands out as a key player in Tunisia and Africa. Specializing in the production of lead-acid and lithium batteries, the group offers solutions tailored to a wide range of applications: starter batteries for light and heavy.

For over 70 years, the ASSAD Group has been the undisputed leader in the battery sector in Tunisia, and remains a major reference on the African continent. Our expertise in the manufacture and marketing of lead-acid and industrial batteries is recognized worldwide. As an industry pioneer, we have.

Founded in 1974, L'Accumulateur Tunisien ASSAD is a Tunisian manufacturer of accumulators, starter batteries and industrial batteries. Its production covers a broad range of uses: automotive uses, marine uses, solar energy, leisure, industry, data processing and telecommunications. The company owns.

On 5 and 6 February 2025, the MENALINKS programme officially launched its Battery Energy Storage Systems (BESS) workstream in Tunisia. The kick-off brought together over 25 high-level stakeholders, including representatives from the Ministry of Energy, Mines, and Energy Transition (MIME), the.

Tunisia's Minister of Industry, Mines and Energy, Fatima Al-Thabat Shibb, has approved four solar projects with a combined capacity of 500 MW Battery Energy Storage System (BESS). France-based Qair International will build a 100 MW facility in the Kasr region of Gafsa province and a 200 MW project.
