

SolarTech Power Solutions

UAE communication base station battery wind power generation

Overview

What does a 103.5 MW wind project mean for the UAE?

The 103.5-megawatt (MW) landmark project will introduce cost-effective, large-scale, utility wind power to the UAE's electricity grid, further diversifying the country's energy mix and advancing its energy transition.

What is the UAE wind program?

The project leverages advances in technology, material science and aerodynamics to capture low wind speeds at utility scale, paving the way for further projects. The UAE Wind Program is expected to power more than 23,000 UAE homes a year.

Why is the UAE launching a wind turbine project?

The project is also creating a foundation of critical scientific wind data, which will form the basis of the UAE's next phase of development.

Where are UAE's wind farms located?

The other wind farm locations include Delma Island (27MW), and Al Sila in Abu Dhabi (27MW), as well as Al Halah in Fujairah (4.5MW). Previously, wind energy was not viable at utility scale due to low wind speeds in the UAE, but innovations within climate technology and UAE-led expertise have made power generation using wind possible.

Where is Masdar battery project based?

The project will be based in Abu Dhabi at an undisclosed location. Technology providers or the selected battery technology type are also yet to be revealed publicly, along with project timelines. It will be delivered by Masdar and the state electricity and water procurement and supply entity Emirates Water & Electricity Co. (EWEC) with partners.

Is the Middle East ready for battery storage?

The Middle East region, meanwhile, has been relatively slow in its adoption of battery storage versus more mature markets like China and the US but is predicted to rapidly catch up based on policy announcements such as Saudi Arabia's Vision 2030 strategy.
