

## SolarTech Power Solutions

# Uzbekistan energy storage home

## Overview

---

Does Uzbekistan need energy storage?

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy storage, with a 300 MW lithium-ion system debuting in 2024 and a goal of 4.2 GW storage capacity by 2030. [The Role of Energy Storage in Renewable Energy](#).

Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 — The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

Does Uzbekistan need advanced ESS?

As Uzbekistan scales up its renewable energy ambitions, the integration of advanced ESS becomes crucial. Trina Storage, a dedicated business unit of Trina Solar, offers state-of-the-art solutions designed to address the complexities of renewable energy integration, ensuring stability, efficiency, and reliability in energy supply.

Who will sell electricity to in Uzbekistan?

The project company is committed to selling electricity to the state-owned National Electric Grid of Uzbekistan JSC under a 25-year Power Purchase Agreement for the project, including a 10-year operating term for the BESS component, signed by these two entities.

How is Uzbekistan transforming its energy sector?

Uzbekistan is rapidly transforming its energy sector with a focus on renewable energy to reduce reliance on fossil fuels. Since 2021, the country has added 10 new renewable plants, including nine solar and one wind facility, with a

total capacity exceeding 2,500 MW, alongside over 2,200 MW from hydroelectric plants.

Will Trina Solar support Uzbekistan's energy transition?

Trina Solar stands ready to support Uzbekistan's ambitious energy transition, combining technical innovation with a deep understanding of local needs. Using Trina's advanced technology, the country can meet its renewable energy goals for 2030, creating a sustainable, reliable, and secure energy supply.
