Western European Outdoor Power Solar Panels

Overview

How big is the Europe solar PV market?

The Europe solar PV market size crossed USD 63.1 billion in 2024 and is set to register at a CAGR of 7.1% from 2025 to 2034, due to the growing focus on green energy and net zero initiatives.

What does Solarpower Europe do?

Looking ahead, SolarPower Europe projects continued expansion, albeit with a call for strategic coordination. The organisation advocates for harmonised EU-wide policies, improved infrastructure, and enhanced digitalisation to unlock the full potential of solar energy.

Which country has the most solar power in Europe?

Europe's leading solar market is Germany with a 47% capacity increase in 2022. However, the Netherlands ranks first in solar power per capita. With technological advancements in solar PV also becoming more cost-effective, more countries are developing more solar projects.

Which country has the highest installed solar PV capacity in Europe?

With roughly 79 GW of solar PV in operation at the end of October 2023, Germany's installed capacity remains the highest in Europe. Germany seeks to fulfil the commitment of its government coalition formed at the end of 2021 to reach 22 GW of yearly installed solar PV by 2026 targeting a total installed PV capacity of 215 GW for 2030.

How much solar power does Europe have in 2023?

The continent has reached a record high of 56 GW worth of solar installations in 2023. That's enough to power more than 40 million homes. European popularity and adoption of solar developments have led many European countries to increase their solar energy capacity. Europe's leading solar market is Germany with a 47% capacity increase in 2022.

Which country has the largest solar market in Europe?

In 2023, Germany leads the EU solar market in both annual and total installations, with 14.1 GW and 82.1 GW, respectively, widening the gap to the second largest market, Spain, which couldn't continue the pace seen in 2022.
