

## SolarTech Power Solutions

# Which solar system is best in Brazil

## Overview

---

Is Brazil a good country for solar energy?

Brazil is blessed with solar radiation resources and has become one of the pioneers in the development of renewable energy in South America. Today, Brazil's distributed installed capacity has surpassed centralized power stations, accounting for 71% of the total installed capacity.

Which region has the most solar power in Brazil?

Today, the north-east leads the country's solar market. According to the Brazilian National Electric Energy Agency (Aneel), the region has accumulated more than 60% of the total power solar capacity that is authorised to operate in the national system (excluding distributed generation).

Does Brazil have a solar system?

The pace of deployment of PV systems in Brazil is staggering, with 70% of them rooftops, exceeding 1GW per month, and doubling the installed capacity of rooftop systems every two years. Brazil is blessed with solar radiation resources and has become one of the pioneers in the development of renewable energy in South America.

Is Brazil embracing solar energy?

Brazil isn't just embracing solar energy—it's revolutionizing its potential in the global energy sector. As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Fifteen years ago, no one could have imagined that Brazil would become one of the world's largest powers in photovoltaic solar energy.

How many solar PV locations are there in Brazil?

Explore the solar photovoltaic (PV) potential across 348 locations in Brazil, from Boa Vista to Rio Grande. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV

potential and identify the optimal panel tilt angles for these locations.

How much solar power does Brazil have?

Over the past decade, Brazil's solar power generation has shown phenomenal growth. From only 8MW of installed capacity in 2013, it has reached 34.9GW by the end of 2023, and exceeded 40GW at the end of March this year.
