

## SolarTech Power Solutions

# Who is the company behind the wind and solar hybrid technology for Uruguay s communication base stations

12V 10AH

## Overview

---

SOWITEC is a company focused on the development of wind, photovoltaic and transmission line projects. With our multidisciplinary team that stands out with high quality projects, we achieve high performance power generation facilities with a low environmental impact.

SOWITEC is a company focused on the development of wind, photovoltaic and transmission line projects. With our multidisciplinary team that stands out with high quality projects, we achieve high performance power generation facilities with a low environmental impact.

Our vision is to develop and participate in projects that aim at sustainability becoming a benchmark worldwide encompassing such values as Ethics and Transparency, Safety, Social and Environmental Commitment and Sustainable Partnerships. SOWITEC is a company focused on the development of wind.

Ken Silverstein covers global energy and climate issues. TOPSHOT - Three birds fly past a wind farm near the city of Florida, about 100 km north of Montevideo, as a storm darkens the sky in the afternoon on February 8, 2018. (Photo by Mariana SUAREZ / AFP) (Photo by MARIANA SUAREZ/AFP via Getty.

Uruguay's grid runs mostly on green energy. Here's what to know - Fast Company Nearly all of Uruguay's grid runs on green energy. Here's what to know Only 2% of the electricity consumed in Uruguay is generated from fossil sources. Wind turbines in Maldonado outskirts, Uruguay. [Photo: Getty Images].

The combination of solar and wind power boosts the resilience of the country's electricity system (Image: Jimmy Baikovicius / Flickr The country already has a 94% renewable electricity mix, but plans to diversify by adding more than 100MW of solar by 2026. HAVANA TIMES – With an electricity mix fed.

Cubico Sustainable Investments (Cubico), one of the world's largest privately-owned renewable energy companies, has completed the acquisition of three operational projects in Uruguay from Brookfield. The transaction comprises two wind farms, 52 MW Carape I and 43 MW Carape II in Maldonado; and one.

This research presents a comprehensive modeling and performance evaluation of hybrid solar-wind power generation plant with special attention on the effect of environmental changes on the system. Therefore the 1700V hybrid module is useful as a power module for an AC690V high efficiency inverter.
